

The *Magic Touch*

***Tunnel
Car Wash
System***

Tri-Foam Arch • The tri-foam arch uses an environmentally friendly triple step process that is applied to the vehicle for a clear coat paint conditioner.

The **Ma**

A BETTER WASH MORE PROFIT

Dual Rinse Arch • The aluminum dual rinse arch with stainless steel manifolds is designed to offer a superior rinsing action using a drying agent and sealer wax.

Wrap Around Brush System • The wrap around washers with tapered design and soft neo glide (closed cell foam) pelts start cleaning at the front of the vehicle making their way around the front, down the side and around the back offering complete wash coverage of the car.

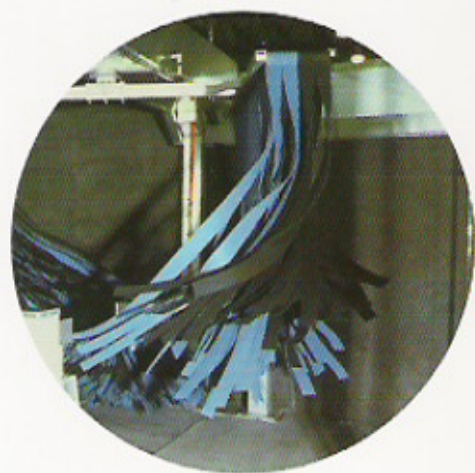

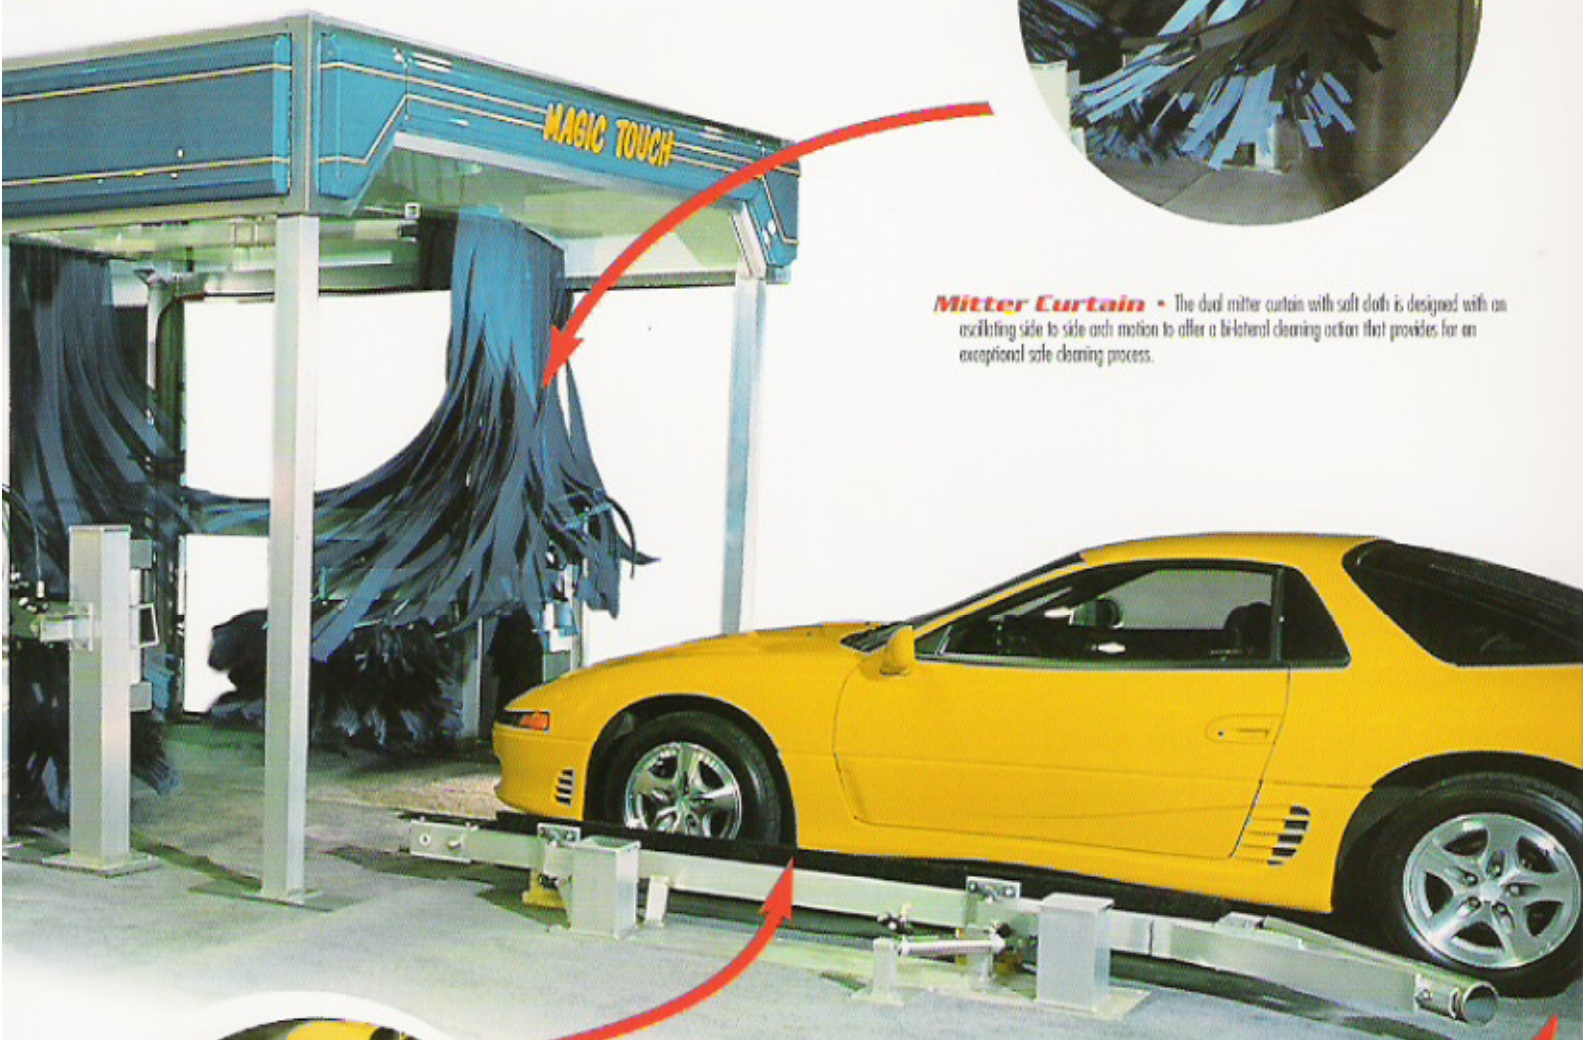

Rocker Panel Brush • The rocker panel brushes with soft foam pelts are designed to wash the lower sides of the vehicle. The tilted arm allows excellent cleaning in the curved areas.

Tunnel Car Wash System

Magic Touch

TH

Mitter Curtain • The dual mitter curtain with soft cloth is designed with an oscillating side to side arch motion to offer a bilateral cleaning action that provides for an exceptional safe cleaning process.

Correlator/Conveyor • The roller correlator is designed to work with the over/under conveyor. It aligns the vehicle with the entry of the conveyor by wheel contact with the guide roller assembly. The conveyor is a roller on demand type.

Tire Brush • The all aluminum tire brush (8" x 96") with Chemical Tire Applicator offers superior cleaning of white walls and white letter tires using a poly nylon brush. CTA are not included in Tire Brush price.

The Magic Touch

Magic Wand has been manufacturing high quality car wash equipment for over 30 years. We have the experience, expertise and means to achieve and maintain the highest in quality standards. It is the special attention to every detail of every product we manufacture that has earned us the trust, confidence and leadership role of the entire industry.

Service is the key to your total satisfaction with Magic Wand products. With our International Distribution Network, you are guaranteed that service is local and available when you require it.

Magic Wand offers three systems in our tunnels: 6000, 8000, and 10000. The 6000 packs 60 cars per hour into 50 feet of space. Our unique cloth cleans irregular surfaces better than similar systems. You can upgrade an 8000 to a 10000 by adding a mitter system and conditioning assembly.

All of our systems are user friendly. This means that the owner/operator can rely on the simplicity of design to make troubleshooting, maintenance and adjustments on the components easy. We use an all aluminum frame construction with stainless steel brackets, pins, shafts and manifolds. All fittings are brass or stainless steel.

Standard System

Optional Extras

- ◆ Vacuum Posts
8" diameter x 9" tall aluminum posts to support the vacuum piping (4)
- ◆ Conveyor
Supply and return hoses with hose ends—
125' 1/2" x 2 wire braid

- ◆ 50' Over and Under Conveyor: Roller on demand, rear wheel push 7'5" roller spacing. Does not include trench cover plates.
- ◆ 10 hp Hydraulic Power System: Flow divider and priority valves.
- ◆ Detergent Arch: 4" aluminum frame with SS pipe manifolds. Chem feed pump.
- ◆ Tire Brush: 8" diameter x 96" long (retracts are extra charge.)
- ◆ Whip Around Brushes: Dual size core 5" top, 10" bottom. Tapered design.
- ◆ Dual Oscillation Mitter Assembly: 1HP electric motor driven 88 pellets doubled over 3" wide.
- ◆ Rocker Panel Brushes: 48" diameter x 21" tall. 10" pellets on a 10" core. Freestanding with 6" square aluminum post.
- ◆ Chemical Tire Applicator: 3 nozzle air foaming spray includes handle and timer.
- ◆ Polish Wax Foamer System: Manifold plumbing and chem feed pump.
- ◆ Dual Rinse Arch: 4" aluminum frame with SS pipe manifolds Chem feed pump.
- ◆ 16 Function Compowash Control System: Push button station, 16 function relay box.
- ◆ 45HP 3 Motor Dryer: Oscillating top nozzle. Stationary sides. Does not include motor controls.

Standard System

Optional Extras

- ◆ Whip Loads
Connect to the services
10' lengths of hoses and So cord
- ◆ Vacuum Posts
8" diameter x 9" tall aluminum posts to support the vacuum piping (4)
- ◆ Conveyor
Supply and return hoses with hose ends—
125' 1/2" x 1 wire braid

- ◆ 85' Over and Under Conveyor: Roller on demand, rear wheel push 7'5" roller spacing. Does not include trench cover plates.
- ◆ 15HP Hydraulic Power System: Flow divider and priority valves.
- ◆ Detergent Arch: 4" aluminum frame with SS pipe manifolds. Chem feed pump.
- ◆ Tire Brush: 8" diameter x 96" long (retracts are extra charge.)
- ◆ Whip Around Brushes: Dual size core 5" top, 10" bottom. Tapered window brushes gravity operated.
- ◆ Dual Oscillation Mitter Assembly: (2 sets) 1HP electric motor driven 88 pellets doubled over 3" wide.
- ◆ Rocker Panel Brushes: (2 sets) 48" diameter x 21" tall. 10" pellets on a 10" core. Freestanding with 6" square aluminum post.
- ◆ Chemical Tire Applicator: 3 nozzle air foaming spray includes handle and timer.
- ◆ Polish Wax Foamer System: Manifold plumbing and chem feed pump.
- ◆ Dual Rinse Arch: 4" aluminum frame with SS pipe manifolds Chem feed pump.
- ◆ 16 Function Compowash Control System: Push button station, 16 function relay box.
- ◆ 55HP 4 Motor Dryer: Oscillating top nozzle. Stationary sides. Does not include motor controls.

Magic Wand Components

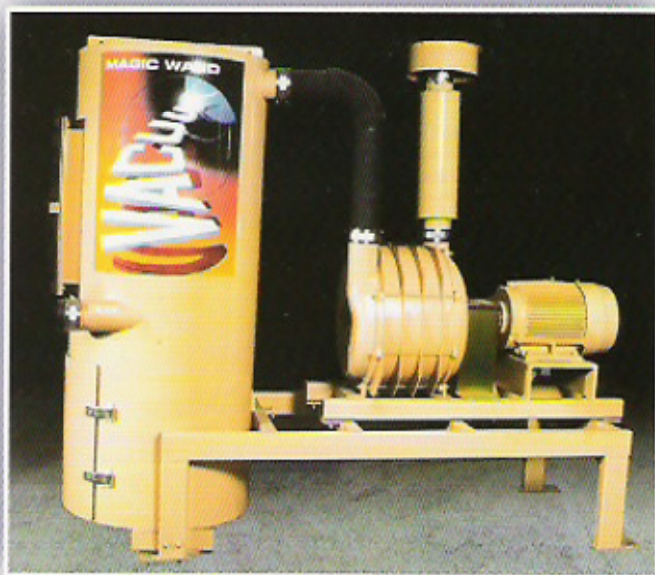

Combined Control Unit

The combined control unit was designed to lower the cost of electrical installation and erection. The compuwash unit is located in the control panel and is prewired to terminal strips.

Neon Signs

The neon signs are available in 7 different colors, including a rainbow effect. The signs have script text and can be ordered with different descriptions. If purchased with one of the tunnel systems, each light is post mounted and wired to a junction box.

Central Vacuum

Available in 4, 6, or 8 drops and 15 HP, 20 HP and 25 HP.
